## Ring Bridge For Lighting

- With one of the following required devices: The Ring Bridge, Ring Alarm Pro, Echo (4th Gen) or Echo Show 10 (3rd Gen) you can enable smart features, such as mobile notifications and customizable settings.
- Pair with Ring Smart Lights to get notifications when motion is detected, customize settings, and connect to other Ring devices - all from the Ring app.
- Installs indoors and receives power through the included Micro-USB power supply and cable.
- Connects Ring Smart Lighting with Ring doorbells and cameras to create a fully connected home security system.
- Allows Ring Smart Lights to work with Alexa to turn on lights and adjust settings with your voice.
- One Ring Bridge supported per household. Supports approximately 50 Ring Smart Lighting devices, including Motion Sensors
